- Petrol pay terminal
- Dispensing and revaluating pre-paid cards

→ Range Features

These features are common to the full **SODECO™ BNA500 series:**

Validator

- Universal inlet with LED indicator, anti-card device, made in robust metal alloy with ergonomic design.
- Exceptionally high first acceptance – 98% – with outstanding security.
- Works in harsh operating environment (0° to +60°C). Inlet to as low as -25°C (dry), optional anti-ice heating.
- Compact, space efficient size
- Same 3 fixing points for all BNA 500 products.
- Additional 2 fixing points with BNA 542 configuration
- Full control of the banknote transport ensures low jam rate.
- Controlled inlet and outlet flaps defeat manipulation.
- Validator opens easily without tools for easy cleaning access.
- On-site banknote configuration with a PC or via a network.

Removable security cash-box

- Banknotes perfectly stacked inside the cash-box.
- Sturdy construction, fast and secure cash-box interchange, electronic identification.
- Different keys for cash-box collection and revenue centre.
- Locking shutter mechanism with automatic reset, several optical and electronic detectors for cash-box handling and identification
